***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Cancel claims 1-5 and 11-13.

2. This application is in condition for allowance except for the presence of claims 1-5 and 11-13 directed to inventions I, III and IV non-elected without traverse. Accordingly, claims 1-5 and 11-13 been cancelled.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

-The closest prior art, Ooishi (US 2002/0128770) discloses (Fig. 1) a navigation system (100) comprises a server (20) for providing positional information, an information terminal apparatus (10) for receiving positional information; wherein the server (20) includes an image data storage block (Fig. 2, database 25) storing actually taken image data (Fig. 1 shows a camera 50 for taking photographs of the ground). Ooishi further discloses (Fig. 2) a positional information database (positional information determination circuit 210). See sections 51-55.

However, Ooishi fails to teach "the sever includes ...a positional information database storing correlation data between an identifier of image data stored in the image data storage block and positional information, and a file selection block for executing processing of obtaining, based on positional information received through the base station, an image data identifier corresponding to the positional information from the positional information database and obtaining actually taken image data from the image data storage block based on the obtained image data identifier;

the base station includes a regional information management block for managing information including the positional information of itself and, based on an inquiry for a position from the information terminal apparatus, executing processing of transmitting positional information stored in the regional information management block to the server."

-Ogaki (6,912,462) discloses (Fig. 1) a navigation system for providing positional information through a network.

-Yokata (6,604,049) discloses (fig. 1) a system using spatial information utilizing a client, which includes a camera for obtaining image information and positional information about the location of the client apparatus from a GPS satellite.

-Park et al (US 2004/0260458) disclose a navigation system using wireless communication network and a route guidance method.

-Polard (US 2004/0010367) discloses (Fig. 1) a mobile terminal device, which has a touch sensitive screen for displaying an image including the pictorial representation of a location.

-Moore (6,377,210) discloses (fig. 1-3) a navigation system for providing positional information through a network.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
